

ASSEMBLY DIAGRAM

OPTIONAL EQUIPMENT

BRASS READING LAMP / #BRL

Attach an elegant brushed brass reading lamp to the reading table of your new Speaker Stand. Not only will you shed light on the subject, but you will add pizzaz to your new stand (sold separately).

ASSEMBLY INSTRUCTIONS

Assembly Tips

All assembly should be done on a clean protected surface, such as carpet or the like. Assembly is easy and should take no more than 10 minutes.

Parts

- (1) Base
- (1) Lower Tube with Height Adjustable Knob
- (1) Upper Tube with 5" x 5" Plate
- (4) Screws
- (1) Reading Top Table
- (1) Plastic Cup Holder

Tools Required

Phillips-Head Screwdriver.

Assembling the Unit

- 1) Place the **reading surface** face down on a protected surface with the **bookstop** closest to you. You will notice 4 drilled holes on the underside of the **reading surface**.
- 2) Place the **upper tube** (with the 5" x 5" plate) on top of the underside of the **reading surface**. Match the 4 drilled holes up to the 4 holes on the plate. The **upper tube** should be angled towards you.
- 3) Insert the (4) **screws** into their respective holes and tighten with screwdriver.
- 4) Hand tighten the **lower tube** onto the threaded **coupling** on the **base**.
- 5) Insert the **upper tube** into the **lower tube** (which you have already attached to the **base**) — making sure that the **bookstop** on the **reading surface** is *facing* you. *Do not* let the screw part of the **knob** enter the tube yet, as this will obstruct the top from going in.
- 6) Gently tighten the **knob** for the desired height.
- 7) Insert **plastic cup holder** into **reading surface**.
